### SPECIAL

#### OFFERING #10

These magnificent well established Orchid plants will pay for themselves in cut flowers this winter. These vigorous plants of *C. Schroderae* and *C. Trianae* for the most part are only a few years from the forest.

To those who live in climates suitable for growing Orchids outside, this is a wonderful opportunity to buy plants for tree planting, thereby giving your garden a truly tropical atmosphere. You will not have to wait from 12 to 30 months for blooms as you would if the plants were not already established. These plants will flower within the next six months.

Buy with confidence! Immediate shipment with careful packing. We will send the most vigorous plants in our greenhouse. Culls will go into the furnace.

CATTLEYA SCHRODERAE Blooming season is February through April. The flowers are of varying shades of pink to lavender with bright yellow throats.

CATTLEYA TRIANAE Blooming season is December through February. The flowers have light lavender petals and sepals and a dark lavender lip.

Plant with one lead or sheath .....	\$5.50
" " two leads or sheaths .....	7.00
" " three leads or sheaths .....	8.50
" " four leads or sheaths .....	10.00
